5. Any antennae proposed to be mounted on an existing building or structure not initially constructed for the mounting of antennae shall meet the following requirements
- a. Antennae may only be mounted on a building that is taller than 55 feet, and they may only be mounted on the part of the building that is higher than 45 feet above grade. In the event that there is no building of that height within the applicant's needed coverage area, the applicant must present evidence of such to the Planning Board in order to gain approval to use a lower-height building.
 - b. No antennae shall be mounted higher than the building parapet, stair or elevator shaft/penthouse, chimney, smokestack or other part of the structure upon which it is being mounted. The only exception to this shall apply when the applicant can provide evidence to the Central Planning Board that appropriate broadcasting and reception service is not possible without a higher mounting configuration such as a mounting on poles or posts.

In such case, the antenna units must be set back at least ten (10) feet from the exterior edge of the part of the building upon which they are being mounted; the antennas and poles must be mounted on a flat surface; and the mountings cannot be more than ten (10) feet tall measured from the edge of the surface upon which they are being mounted.

- c. Wall mounted antennae cannot project horizontally beyond the wall upon which they are being mounted by more than one (1) foot and they cannot project beyond the site's property line.
- d. All antenna units and accompanying infrastructure must be painted to match any vertical surface upon which they are being mounted. Pole mounted units shall be painted light blue. Antennae must be mounted in such a way that they are evenly spaced along the building's wall and they are evenly spaced from corners or other building features such as windows, brackets or decorative panels. All wiring and/or cable tray devices must be positioned in such a way as not to be visible to the public unless determined by the planning board that there is no possible way to position the wire tray to not be visible to the public. The applicant may use external wiring only if it can provide evidence to the Central Planning Board that wiring through the building is not possible for structural reasons. If external wiring is to be used, it can only be mounted on outside walls that are not visible from any public street, park, or plaza. Such wiring and/or wire trays must be painted to match the wall surface upon which they are being mounted, and it must be mounted at an area so as not to interfere with the architectural features of the building. In the instance that the building upon which antenna mounting being proposed does not have any wall area that is not visible from a public street, park, or plaza, wiring must be mounted on the wall that is visible from the street with the least vehicular and pedestrian traffic.
- g. All equipment must be kept inside the building where the antennae project is proposed to be conducted. If this is not possible, the applicant must present reasoning for this to the Planning Board, and the equipment must then be placed inside a structure to be placed on a flat part of the building's roof that is no taller than ten (10) feet, is set back at least fifteen (15) feet from all edges of the roof, is built of an exterior construction material with the same appearance as the exterior walls of the building, and has no more than 150 square feet of floor area.

- h. The Central Planning Board may deny or limit approval of a Commercial Antennae if it reasonably concludes that the number, location, size and elevations of the radiating elements are not required for the proposed operation under FCC License, are intended for rental, lease or sale to other persons for unrelated operations, fails to meet FCC Regulations, fails to meet any of the above-mentioned criteria, or generally impairs the visual environment.
- i. A Conditional Use permit shall be valid for a maximum period of three (3) years at the determination of the Central Planning Board, and it may be revoked at any time.
- j. The applicant shall be responsible for all maintenance of its antennae additional hardware, accompanying landscaping, camouflage, paint, cables, cable trays, conduits, and mounting hardware.

Statement

This Ordinance **amends** Title 40 to include the Definition of Commercial Antennae and other related definitions as it pertains to Commercial Antennae and to prohibit Commercial Antenna in all Districts **except** Industrial Business Districts where such use can be permitted by Conditional Use only.
